

## **CHOOSE K-RAIN GEAR DRIVE SPRINKLERS FOR YOUR LAWN.**

K-Rain irrigation products set the industry standard for performance, reliability, versatility, ease of installation and use. Packed with innovative features and patented, water-efficient options, K-Rain gear drive sprinklers have every residential and light commercial application covered.

### **ADVANTAGES OF USING A GEAR DRIVEN SPRINKLER**

- ✓ Gear drive sprinklers have a higher tolerance to wind to ensure more water lands on the lawn and less blows away.
- ✓ Gear drive sprinklers have a larger spray radius and a smaller quantity will cover a large watering area, compared to popups.
- ✓ Gear drive sprinklers feature an enclosed body which protects the drive mechanism from dirt and debris, which results in less damage and less maintenance.
- ✓ Gear drive sprinklers are more suitable to properties with slopes due to their wider coverage and throw range.
- ✓ Gear drive sprinklers have lower precipitation rates offering better water absorption for clay-type or compact soils.
- ✓ Gear drive sprinklers provide a steady stream of water back and forth across the spray radius offering even water distribution across the area they water.

# GEAR DRIVE SPRINKLER RANGE

## K1

The K-Rain K1 delivers a quiet yet thorough performance. This powerful sprinkler features a 9m maximum spray distance and can provide coverage for small to medium size lawns.

### IDEAL FOR

Small lawns and replacing pop up sprinklers

### ARC ADJUSTMENT

40° – 360°

### SPRAY RADIUS

5m – 9m

### FLOW RATE

5.7 – 6.4 LPM  
@ 2.1 – 3.4 bar

### INLET

15mm screw thread

### RISER

Ratcheting riser

### SPRAY PATTERN

Part and full circle

### NOZZLES

Pre-installed nozzle with additional nozzles available for purchase

## K2

The K-Rain K2 comes with easy arc setting that allows adjustment of distance. Pre-installed with a 9.5 LPM single-steam nozzle, this adjustable sprinkler can cover medium to large areas and shrubs.

### IDEAL FOR

Larger lawns and landscape areas

### ARC ADJUSTMENT

40° – 360°

### MAX RADIUS

11m – 12m

### FLOW RATE

9.5 – 13.2 LPM  
@ 2.1 – 4.1 bar

### INLET

20mm screw thread

### RISER

Ratcheting riser and tamper resistant clutch

### SPRAY PATTERN

Part and full circle

### NOZZLES

Pre-installed nozzle with additional nozzles available for purchase

## K5

The K-Rain K5 has 4 built-in water saving nozzles to help you reduce water consumption up to 30%. Simply select the spray pattern and corresponding water saving nozzle for uniform watering.

### IDEAL FOR

Larger lawns and water saving

### ARC ADJUSTMENT

40° – 360°

### MAX RADIUS

6.7m – 14.6m

### FLOW RATE

4.9 – 20.1 LPM  
@ 2.8 bar

### INLET

20mm screw thread

### RISER

Ratcheting riser and tamper resistant clutch

### SPRAY PATTERN

Part and full circle

### NOZZLES

Four built in nozzles

## RPS75i

The RPS® 75i has a pre-installed water saving nozzle to help you reduce water consumption by up to 30%. Control distance and water flow proportionately by up to 50% without needing to change nozzles or use a break up screw.

### IDEAL FOR

Larger lawns, verges and high traffic areas

### ARC ADJUSTMENT

40° – 360°

### SPRAY RADIUS

8m – 11m

### FLOW RATE

8.0 – LPM @ 2.4 bar

### INLET

20mm screw thread

### RISER

Ratcheting riser, available in vandal resistant steel

### SPRAY PATTERN

Part and full circle

### NOZZLES

Pre-installed nozzle with additional nozzles available for purchase

*A direct replacement for Hunter®, PGP® and PGP Ultra® cans.*
