Managing Director Wally Edwards

For ease of presentation we have divided our products into three groups—Holman Garden, Holman Plumbing and K-Rain

There are three separate catalogues that set out our products in these groups.

Our product offering has been developed over the last 32 years. Most Holman products have been conceived and designed within our business. We employ our own engineers and designers who develop our ideas and concepts and turn them into products. Where possible we manufacture these in Australia.

Holman are proud to represent K-Rain and Elysee in Australia and New Zealand. Like Holman, they are family owned businesses with an innovative culture.

Holman has seven well-stocked warehouse locations around Australia. Three have dedicated production factories for moulding and fabricating plumbing fittings. At our Perth headquarters we continue to assemble electronic timers and controllers.

Our Holman Team look forward to working closely with you, our customers. Business success comes from quality partnerships. Holman would like to be your partner across our product range.

Grip 'n' Lock Technology®

SUPERIOR HOSE CONNECTION

Grip 'n' Lock® fittings feature a separate compression ring with extra sharp teeth which lock onto the outside of the hose. They also have a longer tail and a sharp barb, locking the hose from the inside and forming a connection that simply will not fail.

Irrigation Controllers

Professional Grade Control for Solenoid Irrigation Systems

Pro Series Irrigation Controllers

The PRO469 Irrigation Controller is proudly designed and assembled in Australia at the Holman headquarters in Perth, WA. Our team carefully assembles each controller ensuring your final product meets our stringent quality standards. By choosing the PRO469, you're supporting a local business and investing in a product that is made to withstand the unique challenges of the Australian climate. We take great pride in our local processes, and our certification as an Australian Made product is a testament to our commitment to the Australian economy.

Troubleshooters

VH7001

Add-a-Station Transmitter and Receiver Unit

Order QTY: 1

9319841037931

- ✔ 2 zones, 1 active cable – 2 valves
- ✔ Work around broken cables, add a station without adding new wiring
- ✔ Independently control two solenoids with one active cable
- ✔ Solenoids can be individually programmed as if two field cables are used

VH7011

Add-a-Station Power and Signal Booster

Order QTY: 1

9319841039461

- ✔ Use in conjunction with the Add-a-Station Transmitter (VH7001) to boost and clean up the AC signal going to the solenoid valves
- ✔ This will correct for unreliable AC signal going from the controller to the solenoid valves
- ✔ Gets around electronic fuse tripping

VH7324

Automatic Splitter

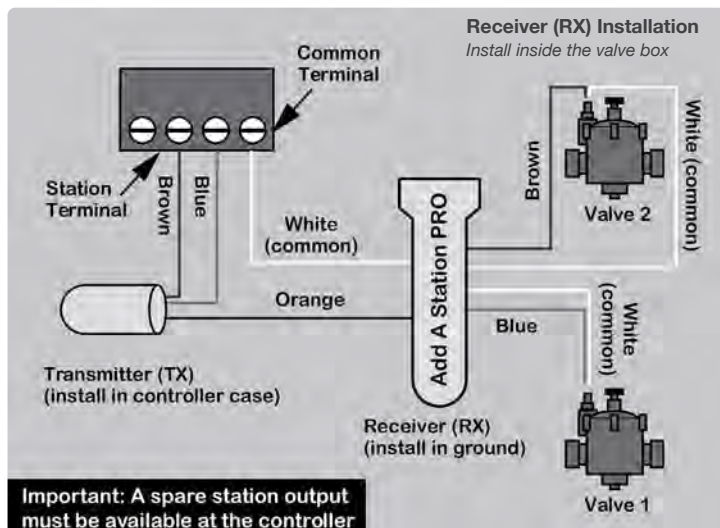

Order QTY: 1

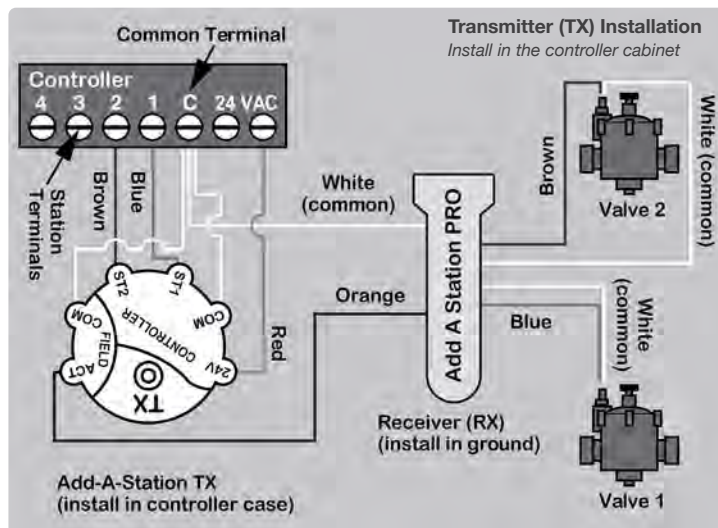

9319841040467

- ✔ 1 zone, 1 active cable – up to 4 valves
- ✔ Located at the existing valve and uses existing wiring with LED status indicators
- ✔ Automatically senses if a coil is connected
- ✔ Program the controller zone for the total amount of run time required for all attached valves and the splitter will do the rest
- ✔ Split the time across the connected valves

Add-a-Station VH7001: 2 Valves – 2 Zones → 1 Active Cable

HOLMAN *ECO*

EzyGuard®: Wheelie Recycled

1. Broken wheelie bins are collected from local councils
2. These are processed into HDPE plastic pellets
3. The pellets are fed into moulding machines at Holman HQ in Perth, Western Australia
4. EzyGuard® Sprinkler Surrounds are moulded from the pellets
5. Bulk products are consolidated and delivered to Holman warehouse
6. EzyGuard® Surrounds are packed and delivered to retailers

102645 In-line Flushing Valve

In-line drip systems are comprised of lots of small outlets that must be kept free of any blockages. This purges out an amount of water every time the drip system is started up. Ensuring any build-up of grit and debris is removed from the system and flushed out.

Watermate®

WM7501 Self Watering Tank 750mL

- ✔ Ideal for potted plants
- ✔ Curved to fit planters
- ✔ Stops water transfer once potting mix is saturated

How it Works

- ✔ Absorbent wick transfers water directly to potting mix
- ✔ As potting mix becomes wet, water transfer slows
- ✔ As potting mix dries out, water transfer increases
- ✔ Consistent moisture levels maintain happy plants!

GH2002 2m² Walk-in Greenhouse Kit

Our Greenhouses make it easy to grow from seed, allowing anyone to cultivate their own nursery in the backyard. They allow growth of seedlings all year round, saving the money and trouble of back and forth to your local nursery. Simply attach to a garden hose to the included misting kit to deliver a fine spray of water over your plants and seedlings.

EzySpray™ Garden Sprayer

No Pump? No Worries!

How it Works

The EzySpray™ does not need manual pumping for day-to-day use. It self pressurises from the pressure of your garden tap. The magic happens when you connect your hose and fill the tank with water; the water expands an internal bladder which cleverly increases the pressure of the system.

**More info
on our
website!**

No Pump? No Worries!

The All-Rounder for Any Garden

- ✓ No pumping required
- ✓ Fill directly from your garden hose
- ✓ Sprays from full to empty
- ✓ Double-check valve for backflow protection
- ✓ Adjustable spray head with 4 x patterns
- ✓ Release valve for accidental over filling

1 Add herbicide, pesticide, fertiliser or detergent as required or leave empty for light watering

2 Connect directly to your tap with a garden hose and 12mm snap-on fittings

3 Fill until the pressure gauge stops rising or the release valve is triggered

4 Then spray! No pumping required!

Get to Know the Weather in Your Own Backyard

WS5029 Aspect™ Wireless Weather Station

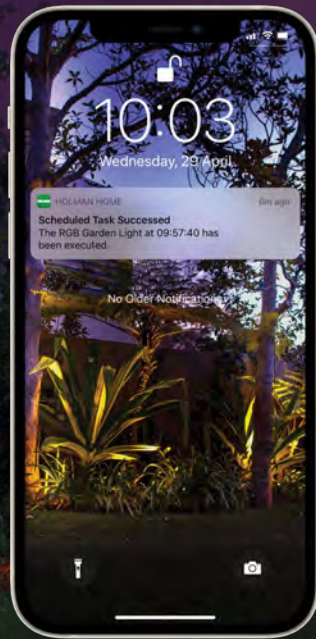

This Weather Station is mounted on the outside of your home and transmits data wirelessly to a display inside your house.

It shows all readings and results including wind direction, speed, rainfall, humidity, moon phases, barometric pressure forecast with trends and indoor/outdoor temperatures with an adjustable alarm function that alerts you when temperatures get too hot or too cold for your comfort.
